ABOUT ME

Computer Science undergraduate with a strong interest in Cyber Security, focused on network security, ethical hacking, vulnerability assessment, and secure system design. Possess a solid foundation in Cyber Security fundamentals and core security principles. Seeking entry-level opportunities in Cyber Security to apply analytical thinking, problem-solving skills, and a strong commitment to protecting digital systems and data.

EDUCATION

BSc Hons in Computer Science (with specialization in Cyber Security), Karnavati University — Expected 2027

SKILLS

Technical Skills: - HTML, CSS, JS, C, R, Python.
Tools Known: - Metasploit, Burp Suite, Hashcat, John the Ripper, FTK Imager, Autopsy.
Soft Skills: - Communication skills, Analytical Thinking, Leadership, Problem Solving.

EXPERIENCE

Web Development Intern — May 2025 - June 2025
byPeopleTechnologies — *Ahmedabad, Gujarat*

- Contributed to the development and design of responsive web applications using HTML, CSS, JavaScript, and Python, improving UI structure and overall user experience.
- Assisted in implementing frontend features and integrating them with backend logic using Python, ensuring smooth data flow and functional website performance.
- Supported website design enhancements by refining layouts, styling components, and improving interactivity using modern web development practices.
- Worked closely with the development team to troubleshoot and debug frontend and backend issues, improving application stability and user experience.
- Gained hands-on experience applying frontend and backend technologies in real-world web development projects.

PROJECTS

Tradingbot Application: -

- Developed an automated trading bot web application that monitors incoming emails for structured BUY/SELL trade signals and executes real-time orders via broker API integration.
- Implemented using Python, REST APIs, IMAP email parsing, algorithmic trading logic, PostgreSQL database, and a responsive frontend (HTML, CSS, JavaScript), ensuring secure, low-latency, and scalable trade automation.

HotWheels Application: -

- Built a full-featured HotWheels toys e-commerce platform with product catalog filtering, shopping cart management, tax/shipping calculation, and order placement workflow.
- Engineered modular JavaScript components for authentication, state management, and LocalStorage-based data persistence with a responsive UI using HTML5 and advanced CSS3.

Stock Market Indicator Application: -

- Developed a Stock Market Indicator Web Platform using Python (Flask), RESTful APIs, SQL, HTML, CSS, and JavaScript to sell and deliver automated trading indicators, implementing secure authentication/authorization, structured user–admin workflows, and seamless payment processing via Razorpay integration.
- Architected a scalable backend with SQL database integration for user management, subscription tracking, and transaction handling, while building interactive frontend dashboards and embedding technical indicator processing logic for real-time signal generation and dynamic data visualization.

CERTIFICATION

eJPT
INE Security

Certified in Cybersecurity (CC)
ISC2

Getting Started with Linux Fundamentals (RH104 - RHA) - Ver. 9.1
